2009 WINTER LECTURE SERIES

# LIVING WITH THE PLANET

## 2009 WINTER LECTURE SERIES

This year's topic was prompted by the need to understand our dynamic planet and the changes that lie ahead. We truly live in an exciting time when the adaptability and ingenuity of man will take center stage as we rise to challenges that may affect both the way we live and in some cases where we choose to live. Join us for an exciting look at our continent, and our region and learn what you can do to better live within our natural resources while supporting sustainable energy.

All lectures will be held at 7 PM at Rockfish Community Center.

### SATURDAY JANUARY 17<sup>TH</sup> US WATER SUPPLY & EFFECTS OF CLIMATE CHANGE

Ken Frederick shares his experience from working with a Washington DC non-profit whose global research in economics and energy has led our nation to better understand the dynamics as well as the limits of resources that affect both economies as well as life styles on our planet.

*Ken Frederick, retired researcher, Resources for the Future*

### SATURDAY MARCH 14<sup>TH</sup> ALTERNATIVE ENERGY

Each panelist will introduce participants to their research in a mini lecture format. A group discussion prompted by comments and questions from the audience will follow.

*Joel Darmstadter, Senior Fellow researcher, Washington DC Resources for the Future.* Joel will share an overview of his global and national research on alternative energy resources.

*Dr David Hagen, Museum Scientist for Physical Sciences, Science Museum of Virginia.* David will discuss his work with new educational exhibits at the Science Museum of Virginia directed at understanding alternative energy resources.

*Patrick Farley, AIA/LEED, Energy and Environmental Progress,* Designer of alternative energy and environmental systems for homes and businesses. Patrick will showcase several of his many unique designs that have been successful in daily living.

*Rick Reynolds, Wildlife Biologist, Virginia Department of Game and Inland Fisheries.* Rick will discuss the potential conflicts between wind farms and wildlife as he shares his study results on the Highland County wind generating project.

### FRIDAY FEBRUARY 27<sup>TH</sup> WHAT MIGHT THE FUTURE HOLD?

Meteorologist, Jeff Halverson looks to the future and what we can learn from the 2008 hurricane season as he discusses tropical tempests, ocean temperature and global warming.

*Jeff Halverson, former NASA meteorologist and current adjunct professor UMBC*

## TICKETS

\$15 FOR EACH LECTURE

\$40 ENTIRE SERIES DISCOUNT  
FOR MEMBERS

*Teacher and student scholarships available.*
