

Cutleaf Coneflower

Rudbeckia laciniata L.

Family:	Asteraceae
Habitat:	Rich low woods, stream banks, roadsides
Color:	Yellow
Height:	3-10 ft.
Exposure:	Full sun to light shade
Bloom Dates:	Aug-Sept
Soil Moisture:	Moist
Soil Quality:	Average
Garden Uses:	Back area of gardens; meadows.
Notes:	Aggressive grower; provides tall bright color late in summer. Plants can be trimmed back before blooming to create lower, bushier appearance. Foliage provides interest. Nectar plant for butterflies and other insects.
